

Background

- the fiber content of these foods.
- since they are very label-friendly.

Project Overview

Result Highlights

- attributes of the HMMA (p < 0.05).
- and back pressure trends (p < 0.05).
- These observed effects correlated well with the

Future work

- Test fibers with different proteins.

Funding

Thank you to GFI for funding this research work.

more uniform protein matrix and more fibrous appearance.

water adsorption or solubility (WAI or WSI) and oil or water holding capacity (OHC and WHC) drive textural modification of the resulting HMMA.
